### Kip Physics Lab

Physics is the study of systems in motion and the energy contained in those systems or if you go by Merriam-Webster:

“A science that deals with matter and energy and the way they act on each other in heat, light, electricity, and sound.”

The Kip Physics Lab is an online resource for students and enthusiasts to learn and take part in physics on the web. Currently under development as a project, we hope to have a place on the web for you to collaborate and meet other like-minded individuals interested in studying physics. Please take a part in the development of the resources by visiting the Online Physics Lab and letting us know what you want.

The plan is to:

- 1.) Implement a development environment.
- 2.) Create a forum for collaboration.
- 3.) Create a forum for students and student academic clubs.
